INTRODUCTION

This checklist of indigenous and adventive plants is based primarily on collections we have made over the past seven years and on the work of Graham (1937) and Lewis (1970). Herbarium studies have added a number of taxa to the list. Among the botanists whose collections have contributed to the list are N. D. Atwood, J. D. Brotherson, H. D. Harrington, B. F. Harrison, N. H. Holmgren, P. K. Holmgren, J. M. Reveal, W. A. Weber, B. Welsh, S. L. Welsh, D. H. Wilken, and K. Wiley-Eberle.

The geographical area of study includes all of the Uinta Basin in Utah bounded by the crest of the Uinta Mountains on the north, Strawberry Valley on the west, the breaks of the Tavaputs Plateau on the south, and most of the Basin in Colorado. With the exception of Daggett County and Vermillion Creek and Yampa River drainages, the area is essentially that studied by Graham (1937). Daggett County, Utah was included as a means to encompass all of the Ashley National Forest and Vernal District of the Bureau of Land Management. The high elevations toward the head of the White and Yampa Rivers are excluded.

The arrangement of the list is alphabetical by family, genus, and species, without regard to phylogenetic order.

Appreciation is expressed to Stanley L. Welsh, Curator of the herbarium at Brigham Young University, who has been bombarded with questions relating to plants on this list, and who left the herbarium completely at our disposal for this study. Appreciation is also expressed to Dieter H. Wilken, Curator of the herbarium at Colorado State University for similar cooperation.

Most of the synonomy included is restricted to names used in relatively current manuals or checklists that include our area or deal with areas adjacent to our area such as Arnow et al. (1980), Cronquist et al. (1972), Cronquist et al. (1977), Harrington (1954), Welsh and Moore (1973), Dorn (1977), Hitchcock and Cronquist (1973), Weber and Johnston (1979), Kartesz and Kartesz (1980), and Holmgren and Reveal (1966).

The authors wish to thank the following organizations for funding and support: Bureau of Land Management - Vernal District Office; Division of Inventory Systems, and Utah State Office; U.S. Forest Service - Ashley National Forest and IHF and RES.

Acer — Aceraceae
- glabrum Torr.
- grandidentatum Nutt. in T. and G.
- negundo L.

Adoxa — Adoxaceae
- moschatellina L.

Sesuvium — Aizoaceae
- verrucosum Raf.

Alisma — Alismataceae
- geyeri Torr. = Alisma gramineum
- gramineum Lej.

Echinodorus — Alismaceae
- rostratus (Nutt.) Engelm. in A. Gray

Sagittaria — Alismaceae
- cuneata Sheld.

Amaranthus — Amaranthaceae
- albus L.
- blitoides S. Wats.
- graecizans L. misapplied to Amaranthus blitoides
- hybridus L.
- retroflexus L.

Rhus — Anacardiaceae
- radicans L. = Toxicodendron rydbergii
- trilobata Nutt.
  - var. simplicifolia (Greene) Barkley
    trilobata

Toxicodendron — Anacardiaceae
- radicans L. var. rydbergii (Small) Erskine = Toxicodendron rydbergii
- rydbergii (Small) Greene

Angelica — Apiaceae
- ampla A. Nels.
- pinnata S. Wats.
- roseana Hend.

Berula — Apiaceae
- erecta (Huds.) Cov.

Cicuta — Apiaceae
- douglasii (DC.) Coult. and Rose misapplied to Cicuta maculata
- maculata L.

Conioselinum — Apiaceae
- scopulorum (A. Gray) Coult. and Rose

Conium — Apiaceae
- maculatum L.

Cymopterus Apiaceae
